

# Project and Drafting Engineer

Mark & Wedell A/S, Ingeniør- og Handelsfirma Kvistgaard

## The Company:

Would you like to become a key employee with Mark & Wedell A/S (M&W) which is a global mechanical/electrical engineering and manufacturing company located in Kvistgaard, 40 km north of Copenhagen? M&W is serving a solid and growing international customer base within the global mining, minerals, metals, power generation and big science markets.

We develop, engineer and produce high quality mechanical and electrical machines, instruments and solutions primarily within representative sampling. Our brand JAWO Sampling and unique know-how are well recognized in our markets and among our customers thanks to our 40+ years of history. We have our own modern machine, metal and electrical workshops and we offer our 40+ employees a combination of a great working environment, international focus and mindset and an exciting product portfolio.

## The Candidate:

We are looking for a project and drafting engineer with technical, customer-oriented and international projects experience who:

- A. takes complete ownership of his/her projects and ensures a high quality and timely execution to the calculated cost
- B. is hands-on when it comes to customisation of existing products as well as construction of new products in 3D CAD

The candidate is also expected to have an excellent understanding of mechanical machines/constructions.

## The Position:

The successful candidate will become part of a team of 10+ competent mechanical and electrical construction and development engineers. The candidate will be responsible for successful coordination and execution on a portfolio of international customer projects from the time of successful sale until final shipment/installation and documentation.

It's also expected that the candidate will be working in 3D CAD that includes layout designs, production drawings and generation of production files for internal and/or external suppliers.

Furthermore, the candidate will contribute actively in our internal transformation program which focuses on digitisation and optimization of workflows and processes.

It is an advantage if the candidate has experience with product reviews as our 35+ products are undergoing a revision based on customer and service engineer feedback.

At M&W you will find a great opportunity to utilize, shape and expand your skills and expertise to the next level within project management, general management, and different commercial aspects in a company with growth ambitions.

The candidate will report directly to the senior management.

## Responsibilities:

- Full and complete execution on a portfolio of international customers projects of our JAWO Sampling activities (DKK0.5-10+m).
- Taking the lead, as well as participating operationally, in your project's internal resource planning including coordination with in-house production and sub-suppliers.
- Produce customer specific drawings in 3D.
- Introduce and implement best practice when it comes to project management including reporting of financials, time schedules, resources, risk, lessons learned etc.
- Supporting the sales team in the ongoing effort to grow the top-line and after sales market.
- Develop a strong relationship with our key-stakeholders; end-customers, EPC's and distributors.

## Qualifications to be successful in the job:

- A bachelor/master's degree in mechanical, industrial or production engineering.
- 5-7+ years of international customer project management in the heavy industry/engineering sector.
- Experience with project reporting and financials.
- Experience with Inventor or similar CAD programs, as well as with Office365.
- Being able to demonstrate a strong technical understanding with focus on mechanical engineering.
- Customer focused and good negotiating skills.
- Energetic and result oriented, yet a pro-active and pragmatic team player.
- Excellent communication skills in Danish and English.
- Business travel 15-25 days per year.
- Aspiring leadership/management skills is an advantage, but not a requirement.
- Experience with machinery directive and Atex is an advantage, but not a requirement.

## We offer:

- A job in an international company with a premium brand and presence in all parts of the value chain from product development, construction, production, sales, project management, installation, commissioning and after sales.
- A chance to work within an agile and non-hierarchical organization and being close to the executive management.
- A carrier opportunity to become team/department manager.
- Flexible working hours.
- A remuneration that will meet your qualification and onward performance.

## Why should you apply?

- Release your potential.
- Explore the world.
- Make a big impact in a medium sized organization.
- Avoid wasting time on corporate politics and unproductive internal meetings.
